A NEW ERA FOR NURSING EXCELLENCE

In May we marked International Nurses Day with an inspirational event at Admiralty House hosted by Her Excellency the Honourable Sam Mostyn AC, the Governor-General, where St Vincent's Curran Foundation formally launched a campaign to advance Nursing Excellence, aiming to secure $12 million over five years in support of our nurses, our patients and the future of care.

The Governor-General recognised the inspirational contributions of Margaret Cunningham AM, Barbara Jarry, Delta Goodrem AM and the Delta Goodrem Foundation for their extraordinary support of St Vincent's nursing excellence programs.

A highlight of the event was the announcement that the JW & M Cunningham Foundation will extend its support of the Margaret Cunningham Nursing Leadership Academy for another five years. Through coaching, mentoring and leadership programs, the Academy continues to develop nurse leaders who guide teams and drive innovation across the health system.

The event was both a celebration and a call to action, recognising nurses' central role in delivering compassionate, person-centred care, while highlighting the opportunity for philanthropy to strengthen the profession across leadership, research, education, practice, wellbeing and digital capability.

At the heart of this vision is the Nursing Excellence framework, led by Nicole de Tullio, Director of Nursing, St Vincent's Hospital Sydney.

"From building courageous leaders and embedding research at the bedside, to expanding education pathways, supporting clinical innovation, investing in wellbeing and embracing digital transformation, each pillar ensures nurses are equipped to deliver the highest standard of care. We are so grateful to all our donors for their vital support enabling our nurses to excel," she said.

This spirit of recognition continued throughout May, with International Nurses Day celebrated through the Delta Goodrem Foundation's Angels & Heroes program, honouring exceptional nurses and supported nationally by Bank First through scholarships and professional development opportunities.

We also celebrated the induction of Sister Anthea Groves OAM rsc into the St Vincent's Hospital Nursing Hall of Fame, recognising a lifetime of compassionate care and the enduring legacy of the Sisters of Charity.

Her Excellency the Honourable Sam Mostyn AC with Barbara Jarry

Together, these and other initiatives are part of a larger story inspired by the pioneering Jarry Program for ICU Nursing. Established through philanthropy, the program has demonstrated what is possible when donors invest in nursing: stronger capability, improved patient outcomes and a culture of excellence that endures.

Building on this legacy, more than 200 post-graduate nursing scholarships have been awarded over the past five years. Generous donors including Gretel Ainsworth, Marlee and Michael Anker, Clelia Cantarella, the Croll Family, Charles Curran AC and the Curran Family Foundation, Sandra and Gemma Salteri, Louise Walsh AM, Jackie Waterhouse and Felicity Youl have enabled registered nurses to undertake diplomas, strengthening clinical expertise and enhancing patient care.

As we look ahead, the Nursing Excellence Campaign builds on this momentum with a clear promise: that every nurse at St Vincent's will be supported to learn, lead and thrive, ensuring exceptional care for every patient, every day.

"These trailblazing programs are nationally significant for the profession of nursing and for healthcare everywhere."

Her Excellency the Honourable Sam Mostyn AC, the Governor-General

IMAGING THE FUTURE WITH NEXT-GENERATION EQUIPMENT

A TRANSFORMATIONAL GIFT TO ADVANCE MEDICAL IMAGING

A visionary gift of $4.5 million from Harry Triguboff AO and the Triguboff Foundation has helped transform diagnostic imaging at St Vincent's Hospital Sydney, ensuring patients have access to the most advanced MRI technology.

This extraordinary philanthropic gift, along with contributions from other generous donors, will fund two next-generation MRI machines and the refurbishment of the Hospital's MRI facilities, which will be named the Moshe and Frieda Triguboff MRI Suite in recognition of the Triguboff Family's generosity.

MRI technology plays a vital role in almost every area of the hospital, supporting emergency stroke intervention, neurology, cardiology, respiratory medicine, cancer care, emergency trauma and countless other specialties. Every day, clinicians rely on MRI imaging to make fast, accurate decisions during some of the most critical moments in a patient's care.

A/Prof Yael Barnett in the Moshe and Frieda Triguboff MRI Suite

The new technology will help meet growing demand for imaging services while delivering quicker, more precise scans. It will provide clinicians with sharper diagnostic information, enabling earlier diagnosis, improved treatment planning and better patient outcomes. The upgraded MRI Suite will also strengthen St Vincent's world-leading research capability, helping accelerate discoveries that benefit patients across Australia.

This transformational gift ensures St Vincent's remains at the forefront of medical imaging innovation, providing world-class care.

On behalf of our patients, clinicians and researchers, we extend our deepest gratitude to Harry Triguboff AO and the Triguboff Family for their extraordinary commitment to advancing healthcare at St Vincent's.

We are also grateful to ABC Tissue Products and the Henry Ngai Charitable Foundation, the JW & M Cunningham Foundation, the d'Albora Family Foundation, the Oatley Family, Rodney and Judith O'Neil Foundation, the Alan & Lynne Rydge Foundation, and the Turnbull Foundation for their impactful support. Together, these donors and many more have contributed $9.9 million of the $22 million required to renew the hospital's medical imaging equipment over the next three years. We are also grateful to the St Vincent's Curran Foundation's Neville Grace Enabling Fund for invaluable support through an enabling grant that helped fast-track this vital project.

"This extraordinary gift will ensure patients and clinicians have access to the most advanced MRI technology available, supporting faster diagnoses, better treatment decisions and groundbreaking research for years to come."

A/Prof Yael Barnett, Director of Radiology and Head of MRI

IMAGING THE FUTURE, SAVING MORE LIVES

Every scan tells a story. A tumour detected earlier. A stroke diagnosed faster. A treatment plan guided with confidence.

For Australian Army Major Hugo Toovey, advanced medical imaging was critical in his cancer journey. After overcoming testicular cancer, he was later diagnosed with bowel cancer, with imaging helping clinicians quickly identify the problem and begin urgent treatment. Today, Hugo is a proud two-time cancer survivor, husband and father, and a passionate advocate for the life-saving role of medical imaging.

Each year, St Vincent's Medical Imaging performs more than 110,000 scans and supports almost 500 clinical trials, helping clinicians make critical decisions when every second counts.

Thanks to the generosity of our community, more than $290,000 was raised to help replace vital fluoroscopy equipment. The new technology will deliver clearer images, faster diagnoses and better outcomes for patients facing cancer, stroke, brain injury and other serious illnesses. It will also support clinicians with greater precision and efficiency.

As we say at St Vincent's *'everybody matters and every gift counts'.* **Thank you.**

Hugo and Amber Toovey with son Teddy

"There were times when things weren't clear and that's the hardest part - the unknown. But when doctors can confidently say, 'this is what's happening, and this is what we'll do,' it makes all the difference."

Hugo Toovey

MESSAGE FROM OUR CEO

As we look ahead, we are excited that in 2027 we will be celebrating St Vincent's Hospital Sydney's 170th anniversary, a remarkable milestone reflecting a legacy of care, innovation and compassion. From the very beginning, community support for the Sisters of Charity's vision and mission has played a vital role.

On behalf of the Board and Trustees of the Foundation, I extend our deepest gratitude to all our donors and partners. Your support in the last financial year has enabled so much to be achieved across St Vincent's Hospitals and research facilities.

We are particularly grateful to the JW & M Cunningham Foundation and the Alan and Lynne Rydge Foundation for their transformational support, distributing $5.8 million and $1.8 million respectively in grants to advance priority initiatives.

It was a great honour to gather at Admiralty House as guests of the Governor-General, Her Excellency the Honourable Sam Mostyn AC, to celebrate more than $6 million contributed by donors over the past five years to our Nursing Excellence initiatives and to celebrate International Nurses Day.

We also celebrated moments that unite and inspire our St Vincent's community. Delta Goodrem AM made us all immensely proud with her Eurovision Grand Final performance, and we thank her and the Delta Goodrem Foundation for all they do to support Nursing Excellence and Cellular Therapies.

Thanks to the leadership of John Sample and Simon Mills, who inspired many other generous donors, we have fully funded the acquisition of the Brainlab system for St Vincent's Private Hospital, ensuring this advanced technology is now available for the lifesaving work of our neurosurgical teams.

Philanthropy continues to enable innovation across our precinct. A visionary gift from Mr Harry Triguboff AO and the Triguboff Foundation has supported the acquisition of two new MRI machines, enhancing imaging capabilities and improving patient outcomes. We are proud to be naming the MRI Suite in honour of Mr Triguboff's parents, Moshe and Frieda Triguboff.

Shanthini Naidoo, CEO, St Vincent's Curran Foundation

With the support and leadership of Anthony Liveris, we recently co-hosted Challenger Pitch for Health, Australia's largest medical and biotech pitch event, with our corporate partner Proto Axiom to accelerate clinical breakthroughs and foster innovation. We will soon also be opening the new Paula Liveris Innovation Hub to strengthen the culture of innovation across the Precinct.

Intergenerational support of our hospitals was celebrated at our Evolution of the Foundation Dinner bringing together families who are "in it for good" through their ongoing contributions to the St Vincent's Curran Foundation. Thanks to Jeremy Byrne and Andrew Muston for co-hosting this special event.

As we reflect on all that your support is helping our hospitals achieve, we are deeply grateful for your continued engagement. In the coming year, we look forward to honouring the rich history of St Vincent's while continuing to create an everlasting impact for generations to come.

Shanthini Naidoo
CEO, St Vincent's Curran Foundation

INTERNATIONAL NURSING COLLABORATION POWERED BY PARTNERSHIPS

The recent visit of Maura Dacey, Director of Research Nursing and Dr Terri Jabaley, Associate Director, Evidence and Innovation Centre, Cantor Center for Research in Nusing, from the Dana-Farber Cancer Institute, Boston, to St Vincent's Hospital Sydney marked a significant milestone in the American Australian Association St Vincent's Delta Goodrem Foundation Nursing Exchange. Immersed across cellular therapies, clinical trials and the Nursing Research Institute, the visit enabled meaningful collaboration between two leading cancer care organisations.

They were hosted by Annabel Horne, Nurse Manager Evidence and Innovation, and A/Prof Nicola Straiton, Nursing Research Institute, who had previously met Maura and Terri during the Boston leg of the exchange. Made possible through the generosity of the Delta Goodrem Foundation and Les Schirato AM, the exchange is strengthening ties between cancer nurses at both institutions.

Together, they are developing joint nursing research and patient care improvement initiatives, fostering international collaboration and ultimately improving outcomes for patients in both Australia and the United States.

A/Prof Nicola Straiton, Maura Dacey, Annabel Horne and Dr Terri Jabaley

CARINA MARTIN LUNG TRANSPLANT RESEARCH FELLOWSHIP: PIONEERING RESEARCH, LASTING BENEFITS

Thanks to the generosity and vision of the Alexandra & Lloyd Martin Family Foundation, the Carina Martin Lung Transplant Research Fellowship is helping improve the future for lung transplant patients at St Vincent's Hospital Sydney.

Established in 2021, the Fellowship supports clinician-researchers working to improve outcomes for transplant recipients. This investment enables researchers to ask bold questions, explore new ideas and pursue potentially life-changing discoveries.

The Fellowship has supported three thoracic physicians undertaking specialised research into lung transplantation. Most recently, Dr Eisa Tahmasbpour, under the guidance of Associate Director of Lung Transplantation, Dr David Darley, completed two significant studies examining the biological mechanisms contributing to lung transplant rejection. The studies identified promising protein biomarkers associated with inflammation and rejection, offering new insights into why some transplanted lungs deteriorate over time.

By uncovering these potential warning signs, researchers are moving closer to tools that may enable earlier detection of complications, allowing clinicians to intervene sooner and better protect transplanted lungs.

The impact extends beyond St Vincent's. Findings have been published in leading international journals and presented at global scientific meetings, advancing knowledge and care for lung transplant patients worldwide.

The Fellowship has also strengthened research capability within St Vincent's Lung Transplant Unit, supported advanced research technologies and helped attract competitive funding. The Alexandra & Lloyd Martin Family Foundation's generosity continues to create a lasting ripple effect, supporting discoveries that bring hope to patients and families while helping shape the future of lung transplantation.

"We are incredibly grateful for this gift, which is helping us advance research and improve outcomes for lung transplant patients."

Dr David Darley

ADVANCING HEART AND LUNG CARE

St Vincent's continues to honour the people and partnerships shaping the future of heart and lung care.

We remember Steven Harker AM: philanthropist, business leader and passionate advocate, whose generosity helped advance lung transplant research and care. Following his double lung transplant at St Vincent's Hospital Sydney, Steve developed a deep connection with the Hospital and our clinicians. Together with his wife, Linda, he established the Harker Family Lungs for the Future Program, transforming personal gratitude into an enduring legacy of hope. Steve will be remembered for his warmth, generosity and unwavering determination to improve outcomes for others.

The late Steven Harker AM and Linda Harker in the Heart Lung Clinic

St Vincent's commitment to heart and lung patients is further reflected in the redevelopment of its Interventional Cardiology facilities. Equipped with advanced technology, the newly upgraded Laurie Sutton AM and Sutton Family Interventional Cardiology Unit supports complex, minimally invasive procedures and clinical trials, offering safer treatment, faster recovery and improved outcomes.

Along with the Sutton Family, the redevelopment has been enabled through the generosity of an extraordinary group of philanthropic partners, including Jack Cowin AM, Sharon Cowin and the Cowin Family, the JW & M Cunningham Foundation, Colin and Helen O'Neil, Rodney and Judith O'Neil, Phi Phi and Stephen Turner.

Philanthropic support from a visionary anonymous donor is also accelerating research in Prof Christopher Hayward's Mechanical Circulatory Support Research Laboratory, where pioneering projects are advancing next-generation cardiovascular technologies and helping train future clinicians, engineers and researchers.

Together, these achievements demonstrate how philanthropy transforms innovative research into life-changing patient care, creating an everlasting impact.

"For us, philanthropy has always been about personal connection and a desire to give back and make a difference. We want to support things where we feel that personal connection and can be involved beyond just writing a cheque."

The late Steven Harker AM

GIVING PATIENTS A TRUE 'ALL CLEAR'

The **JW & M Cunningham Foundation** is supporting one of Australia's most ambitious breast cancer research programs, with a $1 million pledge over three years to support A/Prof Rachel Dear's work on **AllClear**.

Enabled by a strategic collaboration between the **Garvan Institute of Medical Research**, with St Vincent's Hospital Sydney and UNSW Sydney, AllClear brings together nearly 60 researchers across seven leading research institutes and organisations. The program was the inaugural recipient of the **National Breast Cancer Foundation's Collaborative Research Accelerator Grant**.

A/Prof Rachel Dear and Sally Cunningham

A $25 million initiative, including $8 million raised through philanthropy, AllClear is focused on one of the most urgent and unresolved challenges in breast cancer care: understanding why some cancers return after treatment and how relapse might be prevented.

St Vincent's Hospital Sydney is a lead clinical and research partner, engaging more than 400 patients with early-stage breast cancer through clinical trials, biobanking and research streams. St Vincent's medical oncologist A/Prof Rachel Dear is a co-investigator and program lead, supported by the 2026 Cunningham Fellow in Breast Cancer, Dr Yaseen Omran.

The grant builds on the Cunningham Foundation's longstanding commitment to breast cancer research and care at St Vincent's. Since 2020, the Foundation has committed $2.4 million to breast cancer fellowships, research projects and equipment.

Through the combined power of philanthropy, clinical expertise and research capability, this support brings AllClear closer to its goal: giving more people confidence that their breast cancer will not return.

"If we can predict who is most at risk of relapse and identify dormant cells early, we can develop targeted therapies to eliminate them before they reawaken — this will save lives."

A/Prof Rachel Dear

THE DIGITAL BACKBONE OF DISCOVERY

Discovery and innovation is taking many forms across St Vincent's, from backing bold research ideas and developing a pipeline of projects that address health challenges to building the digital infrastructure that will transform patient care.

In March, Challenger Pitch for Health brought together researchers, clinicians, investors and industry partners to accelerate promising medical discoveries. Delivered in partnership with Proto Axiom, the event awarded $500,000 across four translational research projects, including two $125,000 grants supported by donors to St Vincent's Curran Foundation for new approaches to prostate cancer testing and the diagnosis of rare genetic conditions. We are grateful to Anthony Liveris and Proto Axiom for their support of this exciting initiative.

This spirit of innovation is also driving "Digital Darlinghurst"— St Vincent's preparation for the NSW Health Single Digital Patient Record. This once-in-a-generation transformation will create a connected digital backbone for safer, more personalised care, while giving clinicians and researchers access to more integrated information and data.

Anthony Liveris and Sarah Murdoch, Challenger Pitch for Health judge

The Alan & Lynne Rydge Foundation is helping St Vincent's take an important first step. As part of its 2026 grant making program, it has provided $100,000 for the Patient Care Pathways pilot, matched by a $100,000 St Vincent's Curran Endowment grant. Using the CareMonitor app, the project is developing standardised digital pathways for heart attack, coronary bypass, hip replacement and knee replacement patients - providing the right information at each stage, from preparation through to recovery.

A transformational contribution from the Estate of the late John Skiller is providing $2.5 million to support the implementation of the new EPIC electronic medical record for St Vincent's Palliative Care programs at Sacred Heart as well as Palliative Care at Home services.

Along with the soon-to-open Paula Liveris Innovation Hub, momentum is building around programs that connect people, ideas and technology to solve health challenges faster and strengthen the healthcare system. Together, these initiatives are helping deliver better care and outcomes for St Vincent's patients and our communities.

"It fills me with gratitude that people give their money to fund science. It makes me feel I really have something to give back, because they've given so much to put their faith in me. I hope that I can give back and give Australia - and hopefully the world - a test that makes a difference to people's lives."

Dr Melissa Thomas,
St Vincent's Health Innovation Precinct Winner

CREATING EVERLASTING IMPACT

WAKIL LEGACY

We pay tribute to Isaac Wakil AO and his late wife, Susan Wakil AO, visionary supporters of St Vincent's Hospitals whose generosity enhanced care for patients and families.

Through the Susan and Isaac Wakil Foundation, their support helped transform healthcare, medical research, education and the arts. Their enduring connection to St Vincent's lives on through the Susan Wakil AO Healing Garden at St Vincent's Private Hospital Sydney, and their significant support of the Hospital's redevelopment, helping create world-class facilities for patients, families and clinicians.

We extend our heartfelt condolences to Isaac's family and friends.

Dr Nicholas Ignatenko, Head of Department of Anaesthesia, St Vincent's Private Hospital

EQUIPPING THE FUTURE OF CARE

At St Vincent's Private Hospital Sydney, philanthropy is doing more than funding equipment. It is helping deliver better outcomes, empowering clinicians with technology and ensuring our hospital remains at the forefront of healthcare.

Under the leadership of Campaign Co-Chairs Mr John Sample and Mr Simon Mills, the *Equipping Your Hospital of the Future* campaign is investing in technologies that will enhance patient safety, surgical precision and clinical excellence.

A landmark achievement has been the fundraising effort to acquire the $7.4 million Brainlab Neuronavigational System. Thanks to the generosity of 26 donors and their families, St Vincent's neurosurgeons now have access to imaging and navigation technology that supports precise surgery, improved decision-making and better patient outcomes.

Donor support is helping fund the replacement of 18 anaesthetic machines. These life-support systems play a vital role in every surgical procedure, providing monitoring and safety capabilities that enable clinicians to deliver the highest standard of care.

Thanks to the generosity of The Helens Gift, Dr John Mann, Peter and Kate Mason, Alf and Marian Moufarrige, Nick and Verona Moufarrige, The Oatley Family, Elliott and Tammy Rusanow and many more donors, we have already reached 82% of the fundraising target.

Together, the Friends of St Vincent's are helping ensure our Private Hospital and clinicians are equipped to provide the best possible care.

GRIFFITH COMMUNITY CELEBRATES 10 YEARS OF HEALTHCARE EXCELLENCE, 2016-2026

Celebrate 10 Years of Care at St Vincent's Private Community Hospital Griffith

In 2026, St Vincent's Private Community Hospital Griffith marks ten years of delivering compassionate, high-quality healthcare to the Griffith and wider Riverina community.

To celebrate this milestone, Roy Spagnolo, Joe Casella, Billa Calabria AM and Anne Napoli invite you to the **10-Year Anniversary Gala Dinner** on **Thursday 24 September 2026** at the **Yoogali Club**. This special community event will bring together supporters, partners, donors and friends to reflect on a decade of care and look ahead to the future.

Funds raised will support **Nursing Excellence** at St Vincent's Private Community Hospital Griffith, helping invest in the people, training and resources that enable nurses to provide exceptional care close to home.

The evening is also an opportunity to recognise the remarkable generosity that helped establish the hospital and has sustained it over the past decade. The support of individuals, families, businesses, foundations and community organisations has helped shape a vital healthcare service for the region.

Join us in celebrating this important milestone and helping ensure outstanding care continues for generations to come. Purchase your tickets today by scanning the QR code below.

St Vincent's Private Community Hospital Griffith 10-Year Anniversary Gala Dinner

Thursday 24 September 2026
Yoogali Club

"Our focus for the next decade is simple: supporting our people, embracing innovation and continuing to provide exceptional care for the communities we serve. Together, we can build an even stronger future for healthcare in the Riverina - helping ensure local families can access the care they need, close to home."

Gabrielle Wood, General Manager
St Vincent's Private Community Hospital Griffith

Charles Curran AC, Sorella Abrahams, Rabbi Aycee Abrahams, Rabbi Mendel Kastel OAM, Susan Pearce AM, Hon Ryan Park MP, Anna McFadgen

WHERE GENEROSITY CREATES LASTING IMPACT

The St Vincent's Curran Endowment Grant Program continues to create lasting impact, supporting initiatives that provide comfort today while investing in better care for future generations.

A great recent example is the new Kosher Pantry at St Vincent's Hospital Sydney, a powerful symbol of inclusion, dignity and belonging. At its official opening, NSW Health Minister The Hon Ryan Park MP highlighted its importance in helping patients maintain their cultural and faith practices during a hospital stay.

Made possible through seed funding from the St Vincent's Curran Endowment Grant Program in 2025, it demonstrates how small grants can create meaningful and lasting impact for patients and their families.

St Vincent's Hospital supports people of all faiths, beliefs and backgrounds ensuring they are treated with dignity and respect.

We greatly value the loyalty of our Endowment donors who contribute annually to be 'in it for good', with their gifts helping the Endowment grow its impact into the future.

We also pay tribute to the generosity and longstanding support of the late John Walton AM, who had been a loyal Endowment donor since 1985 and sadly passed away in August this year.

BUILDING A LEGACY OF CARE THROUGH THE MUSGRAVE AND PENNY NAMED PROGRAMS

Inspired by deep personal gratitude for the exceptional care he has received at St Vincent's over the past three decades, long-term donor Michael Musgrave has established The Michael Musgrave Program for Brain Health and Hope. Reflecting Michael's commitment to equality, dignity, inclusion and care for all, the Program will provide annual support for priority projects in Neurology, Immunology and Mental Health.

Michael Musgrave

The Prof Ron Penny AO Program for Immunology has been established to honour Australia's founding clinical immunologist and his enduring legacy at St Vincent's. The Program will support research in immunology, immunodeficiency and immuno-oncology, initially funding a PhD scholarship for emerging clinician-researchers. By supporting the next generation of medical researchers, the Program will help advance discoveries that improve patient care and outcomes.

Together, these initiatives demonstrate the enduring power of the St Vincent's Curran Endowment to create an everlasting impact.

We thank our generous donors who have together contributed more than $1 million to establish the Prof Ron Penny AO Program for Immunology.

Boyarsky Family Trust, the Brennan Lynch Foundation Fund, the V&C Comino Foundation, Charles Curran AC, Ian Ferrier AM and Brad Pillinger, Eva Fischl OAM, the Estate of the late Peter Ikin, Robert Magid OAM and Ruth Magid, Sandra McPhee AM and Kent McPhee, the Penny Family, Nick Politis AM, and John and Ros Sample.

OUR EVENTS

Equipping Your Hospital of the Future Lunch: Matt Wall, Nick Dowling, John Sample, Ron Sample, Michael Richardson and Shanthini Naidoo

St Vincent's Goodman Urban Health Hub launch: Kris Ashpole, Charles Curran AC, Alison Brink, Sam Goodman

Evolution of the Foundation: Sandra Salteri, Gemma Salteri and Paul Salteri AO

St Vincent's Goodman Urban Health Hub launch: Alex Belcastro, Ian Thorpe AM, Angela Bishop OAM, Matt Duncan

TEAM DELTA ON THE RUN

On Sunday, 9 August, 63 passionate runners took on the iconic City2Surf as part of Team Delta, raising more than $21,000 for the Delta Goodrem Foundation's Angels & Heroes Nursing Program in support of St Vincent's nurses. The funds raised will help recognise, thank and invest in St Vincent's nursing workforce, ensuring nurses have what they need to continue delivering exceptional patient care.

The team embraced the challenge together, meeting each Wednesday with support from Vision PT Darlinghurst to prepare for the 14 kilometre course from Hyde Park to Bondi Beach. Their dedication, generosity and community spirit reflect the Delta Goodrem Foundation's commitment to the people at the heart of healthcare through the Angels & Heroes Nursing Program.

"It was great to see Team Delta and the community come out in support of nursing at St Vincent's."

Chad Cowling, Nurse Executive Officer
